

Hand Gel

Alcohol-Free, Medical Grade Hand Sanitiser Removes 99.9% of Coronavirus

A powerful sanitising handrub, effective against a wide range of wide range of bacteria and other organisms with long lasting protection for up to 8 hours. **The product removes 99.9% of Coronavirus when tested against European Standard EN14476.** The formula is alcohol-free, and is specifically designed for regular use without the skin drying, chaffing and irritation associated with regular use of alcohol based handrubs.

Using DDAC as the active ingredient, our gel can be used wherever the highest standards of hand hygiene are required and is suitable for use in healthcare, food processing environments and all other workplaces where there is a risk of cross contamination.

PROTECTION TIME

Proven to be biocidally active on skin for up to 8 hours. After 2 hours 99.99% of newly encountered bacteria were killed. For best protection reapply the product every 2 hours or after hands become dirty.

KIND TO THE SKIN

Being alcohol free our Gel will not dry out the skin and is extremely unlikely to cause an irritant reaction.

Use biocides safely. Always read the label and product information before use. Scotmas are accredited under ICH Q7, Pharmaceutical Good Manufacturing Practice (GMP) for the manufacture of active pharmaceutical ingredients.

EFFICACY

Effective within 60 seconds. Kills up to:

- **99.999% of bacteria** when tested to EN13727
- **99.99% of yeasts** when tested to EN13624
- **Up to 99.9% of Coronavirus** when tested to EN14476
- **99.99% of newly encountered bacteria 2 hours after application**

Scotmas Hand Gel has been tested against European Standard EN14476 and found to remove 99.9% of murine coronavirus within 60 seconds. Murine coronavirus is a laboratory surrogate for enveloped viruses including disease causing coronaviridae such as those responsible for MERS and COVID-19.

Product	Scotmas Product Code	Supplied in
