

Alpha R In Line

- Simple installation, direct to your water line
- Fully automatic alternative to manual dosing of water disinfecting tablets or hazardous "mixed" disinfectant solutions
- Intuitive, rugged design, highly suited to agricultural environments
- Electronic control with onboard data logging
- Simplified pumps, integrated onto the controller to avoid manual changes
- Optional downstream sensor to monitor residual chemical levels
- No specialist installer or operator skills required
- Supplied with security bundled chemical enclosure and water meter if required
- Low power consumption - can be powered by solar and battery storage

Water Flows	100 - 12,000 l/hour @ 0.5 mg/l ClO ₂
Dosing Control	Proportional dosing in accordance with digital water meter input
Pumps	Digital dosing pumps designed to operate over 15 year life cycle
Chlorine Dioxide Grade	Water Treatment Grade to BS EN 12671

Option to reduce chlorite concentration if required.
