

Alpha R In-Tank

- Simple installation, direct to your water tank
- Fully automatic alternative to manual dosing of water disinfecting tablets or hazardous "mixed" disinfectant solutions
- Intuitive, rugged design, highly suited to agricultural environments
- Electronic control with onboard data logging
- Simplified pumps, integrated onto the controller to avoid manual changes
- Optional downstream sensor to monitor residual chemical levels
- No specialist installer or operator skills required
- Supplied with security bundled chemical enclosure and water meter if required
- Low power consumption - can be powered by solar and battery storage

Water Flows	Maximum 12,000 l/hr with Alpha R as standard
Dosing Control	Proportional dosing in accordance with digital water meter input
Pumps	Peristaltic dosing pumps
Chlorine Dioxide Grade	Water Treatment Grade to BS EN 12671
